Hi Jeremiah,

Thanks so much. We are still on track with the schedule and start date, so we are in good shape.

Have a nice weekend!

[CAUTION: External email. Think before you click links or open attachments.]

Eron and team,

I apologize for missing the 14<sup>th</sup> deadline. I want to thank you for the large amount of effort that went into locating the FM and revising the coring locations to avoid any potential conflicts. I understand that was a significant undertaking.

The "no coring buffer area" is acceptable and the team has my approval to proceed as planned. I hope my tardiness doesn't affect your start date. Please let me know if you need anything else from us.

Thanks again, and have a great weekend everyone.

Jeremiah

**Subject:** Arkema Project Area - Proposed "No Coring Buffer Area" around the Sewer Pressure Main

Hi Jeremiah and Dawn,

Attached is a memorandum that summarizes the work completed to locate the City of Portland's pressure sewer main located just upstream of the BNSF railroad bridge near river mile 6.9. The geophysical work was conducted by David Evans and Associates on behalf of Retia Inc., agent for Arkema. The memorandum includes a proposed "no coring buffer area" around the sewer.

Please let me know if the "no coring buffer area" is acceptable to you as soon as possible but no later than March 14. The coring work is scheduled to begin the week of April 4.

Please let me know if you have any questions or if you would like me to set up a Teams meeting to discuss the memorandum.

Thanks!
